GUIDELINES FOR BSP CERTIFICATION WITH CONSULTANT

- 1 – Basic connection, overview of the consultation and how to use the pointer (Exploration of the basics)
- 2 – Review from 1st session (Focus on Dual Attunement, W.A.I.T and not knowing/uncertainty; staying in tail of comet, review the terms, exploring how we use in session and giving case examples).
- 3 – Work on going from dysregulation to regulation (Review from Phase 1) and how to use psychoeducation of the brain.
- 4 – Continue to Review case(s), listening to consultee, consultee perspective, review set-ups, review with consultees strengths and challenges with consultee. Clearly articulate any issues/gaps and what needs to happen for improvement. Have consultee practice on consultant.
- 5 – Review of the consultation process, wrap up anything that needs to be finished, review additional case material (something more specific, additions, child work, performance, parts work).
6. - Have Consultee practice BSP on Consultant to assess dual attunement, etc. Review all items. If Consultee needs more sessions before deemed ready, then discuss and make a plan.
